Mehdi Chibani

Senior Mobile & Full-Stack Development Consultant

Contact : +212 662035527 • mehdichibani2@gmail.com • LinkedIn • Github

Mobile Development Consultant specializing in React Native and Flutter, with experiences in the design, development, and modernization of high-impact mobile applications in morrocco, particularly within the **insurance and public services sectors**. I support organizations in delivering scalable, maintainable, and user-centric mobile solutions, from initial concept and architecture through to deployment and production release. Experienced in Agile (Scrum) environments, I also contribute to performance optimization, code quality improvement, and the mentoring and guidance of development teams.

EXPERIENCES

Mobile development consultant

From 24/02/2025

NEOSYS (On-site at the client's headquarters)

Tools and technologies: React Native, TypeScript, Firebase, OneSignal, Zustant, Gitlab, Vision Camera and MLKit.

Consultating engagements through Neosys :

Participated in the development of the ONCF Voyages mobile application**,** a digital platform developed for ONCF **(Morocco's national railway operator)**, dedicated to train and Supratours bus journey planning, real-time train delay tracking, and automated delay certificate generation. The application also provides updates on railway works, travel offers, and ONCF services across Morocco.

- Implemented a secure authentication system, including biometric login.
- Developed an automated PDF delay certificate generation feature, accessible via QR code scanning of train tickets.
- Integrated a front-camera-based face detection module for generating user profile photos and identification cards.
- Integrated and optimized key features including discount-card association, segmented push notifications, and deep-linking to inprove user engagement and retention.
    - ✓ Available on Google Play Store

Mobile Application Engineer

October 2020 – February 2025

Aramobile (On-site at the client's headquarters)

Tools and technologies: React Native, JavaScript, Firebase, Flutter, dart, React and Next.js.

Methodology: Scrum.

Consultating engagements through Aramobile :

- **August 2023 – February 2025: Mobile App Developer (React Native) – Wafa Assurance**

Contributed to the **end-to-end modernization of the My Wafa application**, a digital platform for managing automobile insurance claims, health insurance, savings, and home multi-risk policies.

- Collaborated with product and business teams to analyze requirements and redesign core business workflows and service processing logic.
- Developed a geolocation-based feature for emergency assistance and locating approved garages.
- Implemented a photo capture feature enabling real-time processing of car insurance claims using images of damaged vehicles.

Tools and technologies: React Native, JavaScript, Firebase and Jira.

Methodology: Scrum.

- ✓ Available on Google Play Store

- **June 2022 – August 2023: Mobile App Developer (React Native) – Ministry of Youth, Culture and Communication**

Contributed to the development of the Pass Jeunes mobile application, a national digital platform designed to provide young residents in Morocco discounts, free access, and exclusive benefits, facilitating access to cultural and public services.

- Analyzed and translated business requirements related to young residents' access to cultural and public services.
- Designed and implemented a geolocation-based feature to display nearby offers and services relevant to users.
- Developed and maintained the mobile application for both iOS and Android using React Native.
- Performed unit testing, troubleshooting, and debugging activities to ensure application quality, reliability, and performance.

- ✓ Available on Google Play Store

November 2020 – May 2022: Mobile App Developer (React Native) – Wafa Assurance
Analysis, technical design, and development of the **Wafa Santé** mobile application, a digital health platform enabling policyholders to manage medical claims, beneficiaries, and healthcare coverage tracking.

- Analysed business processes related to health claims management, beneficiary administration, and healthcare coverage workflows.
- Technical design and implementation of core application features, including medical claims management, beneficiary consultation, and healthcare coverage tracking.
- Developed a geolocation-based service enabling users to locate nearby on-duty pharmacies.
  - ✓ Available on Google Play Store

from 21/02/2020 to 03/08/2020: Mobile Development Intern – Algo Consulting Group
development of a mobile application for the ONCF, designed to provide real-time information on train service disruptions and operational incidents.
Tools and technologies: Flutter, dart, Firebase, .Net Core, and Azure Devops.
Methodology: Scrum.

- **from 03/06/2019 to 02/08/2019: Mobile Development Intern – Algo Consulting Group**

Developed a digital platform to digitize and streamline subsidy application and management processes for the Ministry of Agriculture, Maritime Fisheries, Rural Development, and Water and Forests.
Tools and technologies: Xamarin.Forms, .Net Core and Azure Devops. **Methodology**: Scrum.

- **from 02/07/2018 to 21/09/2018: Mobile Development Intern – RNDFY**

Led the analysis, design, and development of a full-stack e-commerce solution (mobile app and admin web platform) for the sale of facial and skincare masks.
Technologies and tools: React Native, ReactJs, php and PayPal Rest SDK.

- **from 19/06/2017 to 04/09/2017: Mobile Development Intern – TeslaTeam**

Analysed, designed, and developed a mobile application providing various services for Rabat–Salé tramway passengers.
Tools and technologies: Ionic, Firebase and Google Map SDK.

Education

- **2020: Vinci Higher Institute of Computer Engineering and Telecommunications Networks (ISVIIRT)**

Engineering Degree in Software Development and Telecommunications Networks.

- **2015: Technical High School of Taza**

Technical Baccalaureate in **Electronics**

PERSONAL & ACADEMIC PROJECTS

- **From 03/08/2026 : FinCount**

Mobile Application Development and Integration of a personal finance management app that enables users to track and manage their incomes, expenses, and financial accounts.

Tools and technologies: Flutter, Riverpod, Dart and Supabase

- **From 06/03/2026 : BourseIQ**

Technical design and Development of a mobile platform dedicated to monitoring and analyzing the Moroccan stock market, enabling users to track stock prices and market trends through real-time data visualizations, with a community-driven dimension for sharing and following investment strategies.

Tools and technologies: React Native, Zustand, Hibernate, SpringBoot and Spring Security.

- **From 06/11/2019 to 29/12/2019 : LF#Auto**

Analysis and Development of a mobile application for managing employees, their roles, and after-sales services for a car dealership. **Tools and technologies**: Flutter and Laravel.

- **From 23/09/2019 to 04/11/2019 : F#Supp**

Analysis, Design, and Development of a mobile application that enables employees with limited time to shop online, place orders, and have their purchases delivered to their home or workplace.

Tools and technologies: Flutter and Laravel.

- **From 19/03/2019 to 04/11/2019 : Vinci internship management**

Analysis, Design, and Development of a mobile application for managing internships at Vinci Institute.

Tools and technologies: React Native and Laravel.
